

Cleaning and Care Instructions

- Wipe the wood surfaces once per week using a clean, slightly, water-dampened soft cloth. Always wipe in the direction of the grain. Immediately wipe with a soft dry cloth.
- Wipe the laminate surfaces once per week using a clean, slightly, water-dampened soft cloth. Immediately wipe with a soft dry cloth.
- Wipe the metal surfaces once per week using a soft dry cloth.
- Make sure the wood/laminate is not exposed to harsh solvents. We do not recommend commercial products containing high amount of wax or silicon as they can leave a residue and may alter the appearance of the wood/laminate over time.
- Clean up spills right away.
- Use felt or cork pads on the bottom of contact points of accessory items to avoid scratching the finish.
- Avoid placing water glasses or hot coffee cups on the surface.
